

Biopharmaceutical production chemicals and excipients

From discovery to clinical development and production, trust products from Avantor to help you reach the market faster with new breakthroughs

Setting science in motion to create a better world

WE ARE AVANTOR®

From discovery to delivery, Avantor is a global manufacturer and distributor of high-quality products, services and solutions to professionals in the life sciences and advanced technologies industries. We focus on the things that matter most to you, providing exceptional convenience, collaboration and customization to help ensure your success.

Our channel brand, VWR, part of Avantor, offers an integrated, seamless purchasing experience that is optimized for the way you do business. Through our global e-commerce platform, you can access our own brands as well as those from thousands of other manufacturers, so you can get exactly what you need to support your processes.

BIOPHARMACEUTICALS: ENABLING BREAKTHROUGHS IN BIOLOGICS

Today's biologics provide breakthrough solutions for many of the world's most challenging diseases and chronic conditions.

As a supplier for the largest biopharmaceutical companies in the world, Avantor is trusted to provide the products, services and solutions needed to quickly move from the small-scale bench, scaling up in the pilot plant, to full production, reaching the market faster with new scientific breakthroughs in medicine.

When you work with Avantor, you gain a strategic partner with customizable manufacturing solutions, high-quality cGMP materials and specialized services. Backed by extensive regulatory and technical process expertise, we play a vital role in helping to increase drug yield, lot-to-lot consistency and, most importantly, drive results that benefit the world.

Proven brands that enhance your processes

J.T.BAKER® CHEMISTRIES

Our J.T.Baker® brand is known around the world for unsurpassed reproducibility, consistency and application optimization.

MACRON FINE CHEMICALS™ PRODUCTS

Macron Fine Chemicals™ products represent consistency and repeatability, adding value across a wide range of applications.

VWR BIOPROCESSING SOLUTIONS

VWR Bioprocessing Solutions can address all of your needs for upstream applications, as well as downstream purification and final fill requirements.

Trust Avantor to help you overcome unique bioprocessing challenges

QUALITY & CHOICE

EXPERTISE

CONVENIENCE

CUSTOMIZATION

PRODUCTION CHEMICALS

Avantor-manufactured and distributed products provide structured choice and risk mitigation

Global cGMP manufacturing capabilities backed by global change notification programs for regulated materials

Lot-to-lot consistency and comprehensive supportive testing from our brands of high-purity direct materials

Field-based specialists to help you select the most appropriate direct materials for your processes

Data-driven answers to your toughest biopharmaceutical challenges—from gene to protein to final formulation

Global cGDP logistics footprint ensures product integrity and prompt delivery globally
Special logistics and supply chain services, including

- Product certifications provided electronically and/or with shipments
- Customer-reserved inventory to help enable assurance of supply
- Custom pallet programs and barcoded labeling

Global e-commerce platform enables you to get what you need, when you need it

Custom cGMP manufacturing capabilities for direct materials for BioPharma manufacturing—from small scale to high volume manufacturing

Addressing your custom purity needs, new product development and synthesis from cell culture supplements, elemental impurity controlled buffers, through novel excipients

Wide range of packaging alternatives to fit your process for both powder and liquid materials

Quality and supply chain security

Avantor's quality programs use a customer-centric approach designed to decrease complexity and fully satisfy the quality, regulatory and security demands you face every day.

Beyond our own operations, we have robust supply chains and security programs with our suppliers. We track and share how we're doing so you may benefit from enhanced regulatory compliance and minimized risk to drive cost-effectiveness and faster time-to-market for products.

- Global network of cGMP and cGDP facilities: Avantor's cGMP facilities offer manufacturing, packaging and subdivision capabilities to meet your needs. Our distribution facilities have been certified and comply with the International Pharmaceutical Excipients Council's (IPEC) guidelines for Good Distribution Practices (cGDP).
- Change notification: customer notification through the Avantor Management of Change and Change Notification Service (CNS) programs help you stay in control of changing situations and minimize risks associated with changes to manufacturing processes.

- Supplier auditing and integrity: we conduct risk-based audits to understand the capabilities of new suppliers and collaborate with suppliers to promptly address corrective and preventive actions (CAPAs), should they arise.
- Collaborative planning, forecasting and replenishment (CPFR): we provide service level reports on assurance of supply through our Critical Materials Care team.
- Documentation: Certificates of Conformance, Quality or Analysis are available with SDS documents on vwr.com and avantorinc.com.

Change notification programs

AVANTOR MANAGEMENT OF CHANGE PROGRAM

Change is a constant in today's global manufacturing environment. The Avantor Management of Change (MOC) program puts key information into your hands for J.T.Baker® and Macron Fine Chemicals™ brand products so you can stay in control of changing situations and minimize risks associated with changes to manufacturing processes.

VWR CHANGE NOTIFICATION SYSTEM

Change notification for VWR Bioprocessing Chemicals is available through the VWR change notification system. The VWR change notification system provides complete, consistent, reliable, and transparent access to change notification for these materials. A secure web platform allows you to see new change notices, as well as a history of past changes.

Excipients

BIOPHARMACEUTICAL PRODUCTS

Avantor has a strong history as an excipient supplier for the pharmaceutical and biopharmaceutical industry. Choose from a broad portfolio of high-quality, traditional and novel excipients that support scale-up efficiency—from discovery and development, to full commercial production—for both large and small molecule products.
